Employee User Experience (EUX)

March 2023

Summary of Sprint 4 Delivery

Feature	Delivery Status
Trip Display <ul style="list-style-type: none">• Trip header bar, Header section details, Duty info, Flight segment details• Time types modal, Print/Save modal• Flight segment states• Indicator icons• Flight segment details• Crew list & details• Crew meal selection• Trip Summary/Trip Comments• Day Room Request• Crew Lounge/Layover info	Deliver for native mobile in Sprint 4 Tablet & responsive will be delivered in Sprint 5
Customize the Dashboard <ul style="list-style-type: none">• Reorder a dash item• Disable / enable a dash item• Exit customization without saving changes	Deliver for native & responsive in Sprint 4
Data loading indicator	Deliver in Sprint 4. For development team to reference. Not requiring stakeholder review.
Data loading error	Deliver in Sprint 4. For development team to reference. Not requiring stakeholder review.
Customizing Favorites	Continue design iterations Test and deliver in future sprint (TBD)

Trip Display

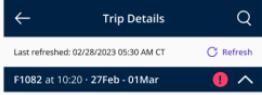

Native Mobile

Trip header bar, Header section details, Duty info, Flight segment details

Most collapsed view is one line

First expansion displays Duty, Flights, Layovers.

Second expansion is at a flight level.

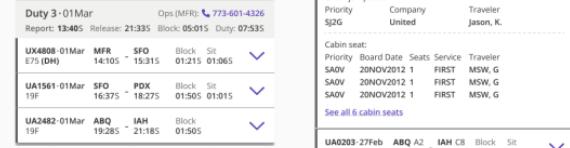

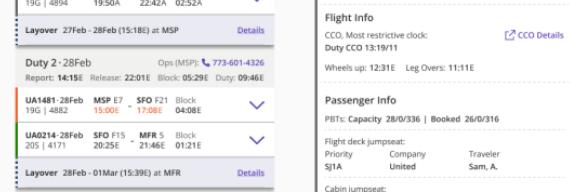

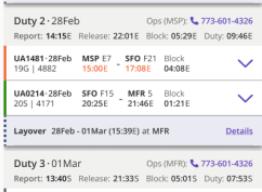

You can expand each flight to reveal flight status, indicator icons, Day room request/Crew Lounge information link, and expandable sections.

Third expansion is at flight details level which reveals expandable sections like Details, Crew and Meals.

Flight segment is expandable in two levels.

Once we work on Calendar stories we might add the link at the bottom of the trip display so they can see the trip in the context of calendar. The link might say "View all trips in the current bid month".
We are NOT including this link for this delivery.

Time types modal, Print/Save modal

When you collapse a trip with a flight or DP with legality violation or warning, ! icon persists at a trip level.

Last refreshed: 01/18/2023 05:30 AM CT Refresh

F1082 at 10:20 · 27Feb - 01Mar Trip level legality indicator

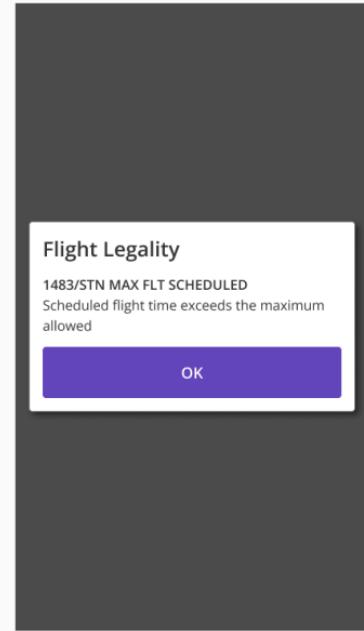

DP level legality indicator

Flight level legality indicator (Red flight# and icon when expanded)

OK

Clicking on an icon will open a modal:

If the legality is at a trip level, the title will say "Trip Legality". Legality at a DP level will say "Duty Period Legality", at a flight level will say "Flight Legality"

Indicator Icons

Flight indicators

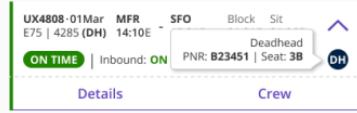

Flight indicator icon opens up a tooltip with the description of the icon.

When a flight is a deadhead, (DH) text appears next to subfleet/tail#.

PNR and a seat info are inside DH tooltip.

Other flight indicator icons will also have a tooltip with its full name.

Awaiting stakeholder approval:
Line Check indicator icon

Option 1:
LCK for both giving/receiving

Option 2:
Left: Line Check giving
Right: Line Check receiving

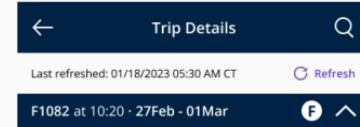

*Either way there will be a tooltip to indicate what these icons represent

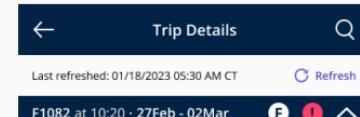

FRMS indicator

FRMS (Fatigue Risk Management System) indicator:

Trip that was build under FRMS (not normal FAR 117) displays a trip level indicator.

Trip can have maximum 2 indicators. FRMS and legality.

Crew Meal Selection

If a flight segment has a meal, the Meals tab will display and clicking the tab will display the default special meal preference elected in settings. A pilot can change the flight's meal by selecting the edit icon. Editing the meal at the flight level will not edit the special meal preference elected in settings.

Customize the Dashboard

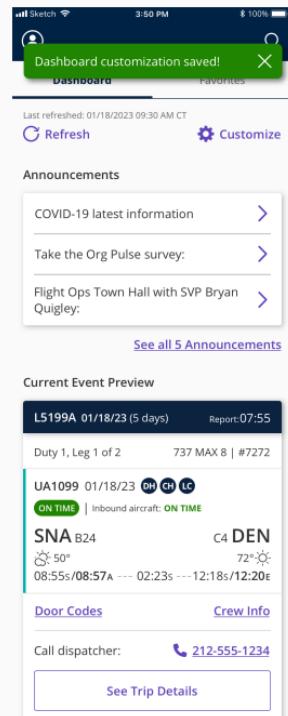

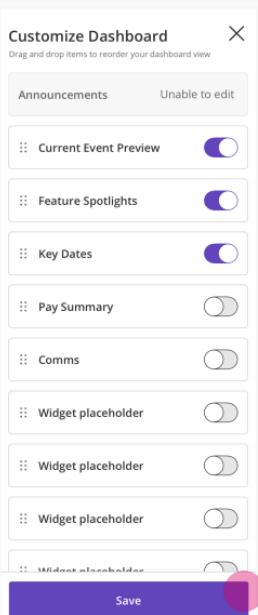

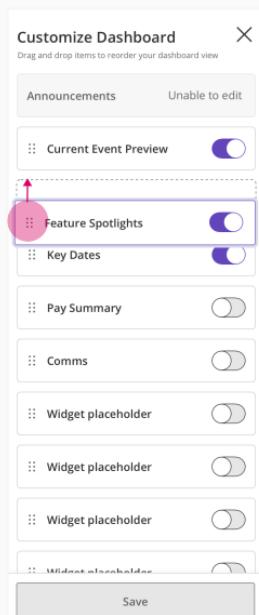

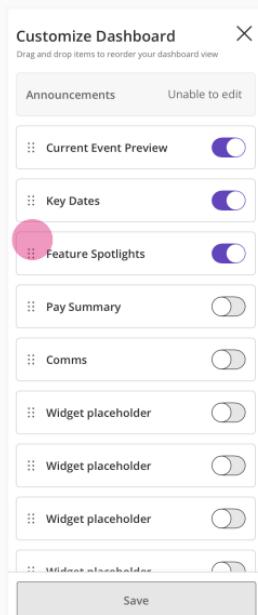

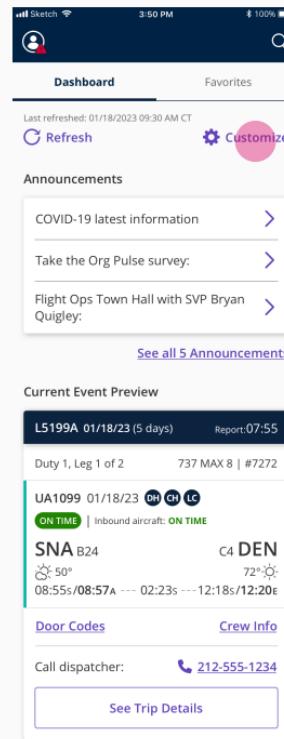

Native Mobile

Dashboard Customization - Reorder dash item

A pilot selects the 'Customize' button on the dash and a full-page modal will display.

Pilot can reorder, hide, or add widgets.

Reorder dash item

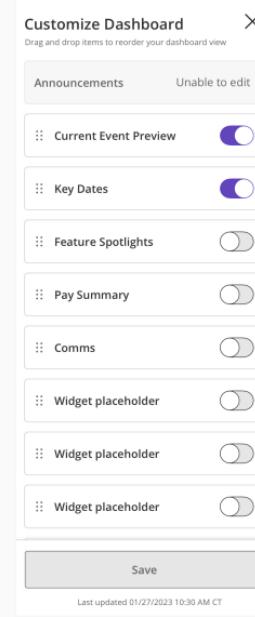

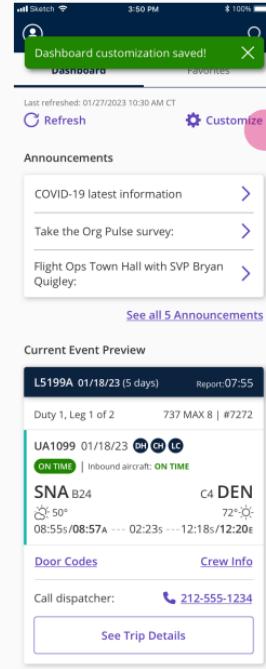

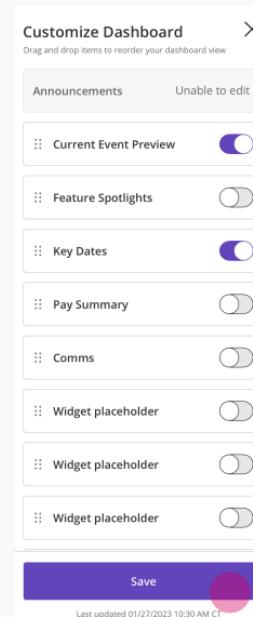

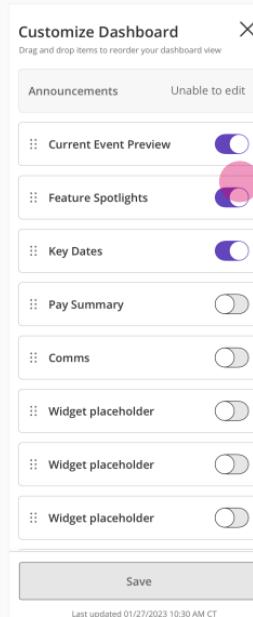

Note: these images are a scrolled view and do not depict actual screen size. Page header and save button will stay anchored on scroll.

Feature Spotlights

Dashboard Customization - Disable dash item

If a pilot disables a dashboard widget, that widget will maintain its location in the list but toggle will update to off. When a pilot saves and revisits the dash customization modal, the recently enable dash item will be in its default disabled location.

Hide dashboard item

Once a pilot saves a change and revisits the customization modal, a time stamp will display indicating when the last update was made to the dashboard.

Key Dates

Dashboard Customization - Enable dash item

If a pilot enables a dashboard widget, that widget will maintain its location in the list but toggle will update to on. When a pilot saves and revisits the dash customization modal, the recently enabled dash item will be in its enabled location.

Display dashboard item

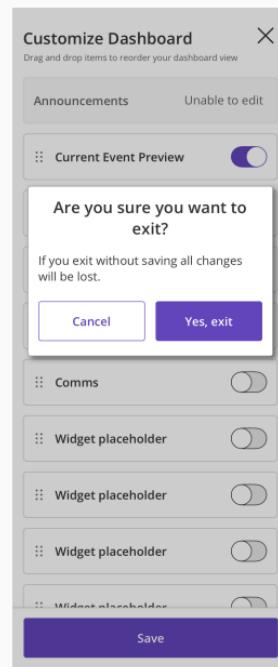

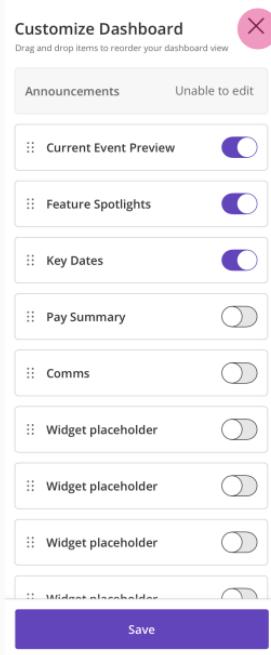

The image consists of three side-by-side screenshots from a mobile application demonstrating dashboard customization.

- Left Screenshot:** A "Customize Dashboard" modal titled "Drag and drop items to reorder your dashboard view". It lists several items with toggle switches:
 - Announcements (disabled)
 - Current Event Preview (enabled)
 - Feature Spotlights (enabled)
 - Key Dates (disabled)
 - Pay Summary (disabled)
 - Comms (disabled)
 - Widget placeholder (enabled)
 - Widget placeholder (disabled)
 - Widget placeholder (disabled)A "Save changes" button at the bottom is highlighted with a pink oval. At the very bottom, it says "Last updated 01/27/2023 10:30 AM CT".
- Middle Screenshot:** A screenshot of the mobile app's home screen showing a green banner at the top that reads "Dashboard customization saved!". Below the banner is a "Dashboard" section with a "Refresh" button and a "Customize" button. The "Announcements" section displays three items:
 - COVID-19 latest information
 - Take the Org Pulse survey!
 - Flight Ops Town Hall with SVP Bryan Quigley!A "See all 5 Announcements" link is shown below the list. The "Current Event Preview" section shows flight details for L5199A and UA1099.
- Right Screenshot:** Another "Customize Dashboard" modal, identical in layout to the first one, showing the "Current Event Preview" item is now enabled. The "Save changes" button is again highlighted with a pink oval. At the bottom, it says "Last updated 01/27/2023 10:30 AM CT".

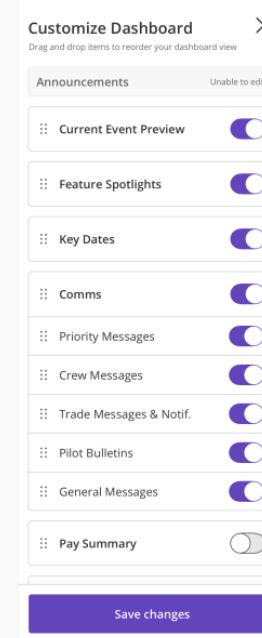

Native Mobile

Dashboard Customization

Exit without saving changes

Pilots have an option to add or remove widgets for Comms and Pay Summary to their dashboard; they can move once added to the list.

When opting into the Comms widget, the pilot can select which types of messages to preview for the widget. The types may include Priority Messages, Crew Messages, Trade Messages & Notifications, Pilot Bulletins, General Messages.

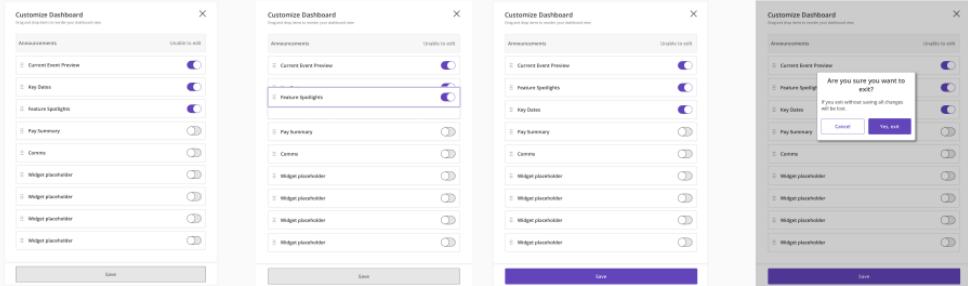

Note: Comms are still being finalized and may be subject to change.

Additional devices

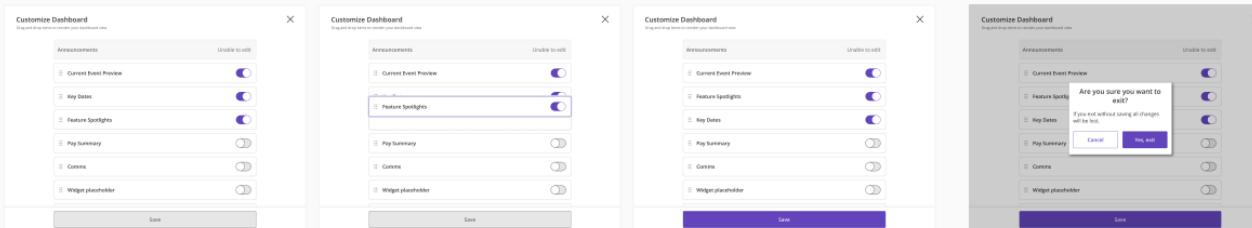

Dashboard Customization

Customization flows and functionality will be the same across native mobile, native tablet, responsive mobile, and responsive tablet. Just different scaling. Please reach out to UX team if additional screens are needed.

Responsive Tablet - Portrait

Responsive Tablet - Landscape

Responsive Desktop

Dashboard Customization

The dashboard displays a standard layout with the following components:

- Announcements:** COVID-19 travel information, Take the Org Pulse survey, Flight Ops Town Hall with SVP Bryan Ovrigy.
- Current Event Preview:** F1002 or 1020 - 16Feb - 20Feb. Details: Duty 1 - 18Feb, 737 MAX 8 | #7272. UA1099 02/10/23 ON TIME.
Flight 644: SNA to DEN. Departure: 08:55/08:57a - 02:23s. Arrival: 12:18s/12:20s. Temperature: 72° F.
- Key Dates:** 02/10/23 10:00 CT PMS Award dispute window (1 hour). 02/09/23 17:00 CT Start saving trip/trade requests for the next bid period (12 days). 03/09/23 23:59 CT Base Trade window opens (10 days).
- Feature Spotlights:** Calendar Sharing Tutorial.

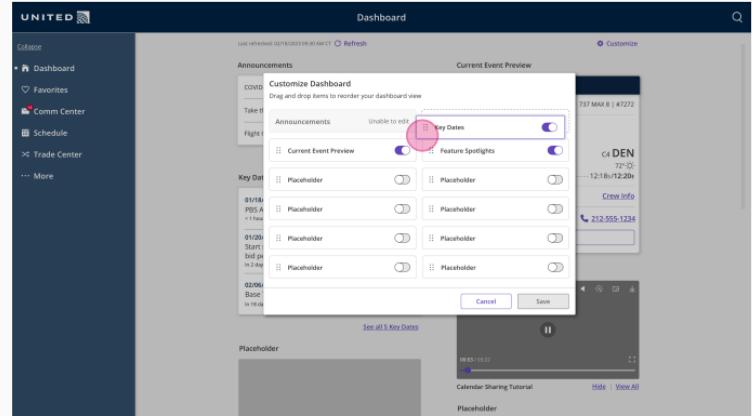

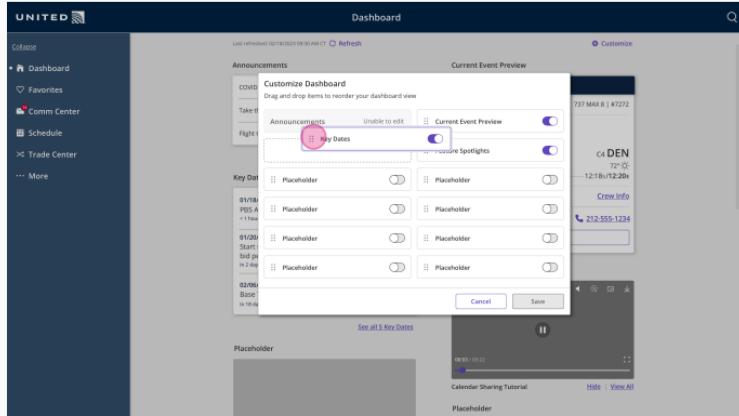

The dashboard is in 'Customize' mode, allowing users to rearrange the layout. A modal window titled 'Customize Dashboard' shows the current arrangement:

Widget	Current Position	Status
Announcements	Top Left	Unlocked to edit
Current Event Preview	Top Right	Locked
Key Dates	Middle Left	Locked
Placeholder	Middle Right	Locked
Placeholder	Bottom Left	Locked
Placeholder	Bottom Right	Locked

Buttons at the bottom right of the modal are 'Cancel' and 'Save'.

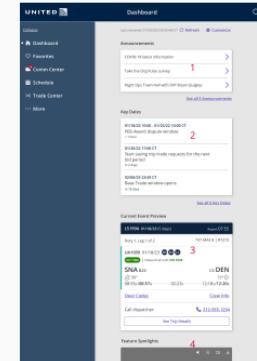

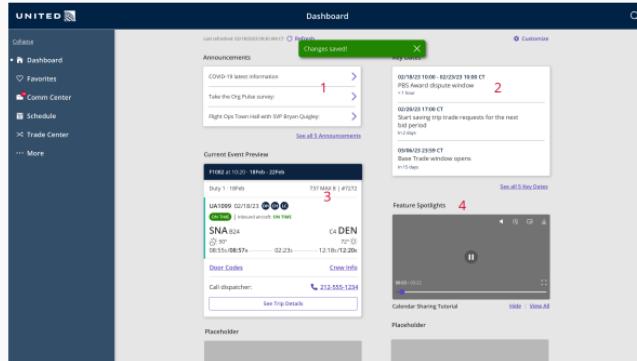

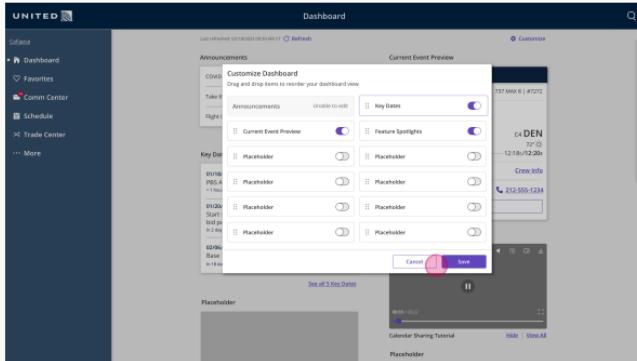

Responsive Desktop

Dashboard Customization

Responsive Desktop

Dashboard Customization

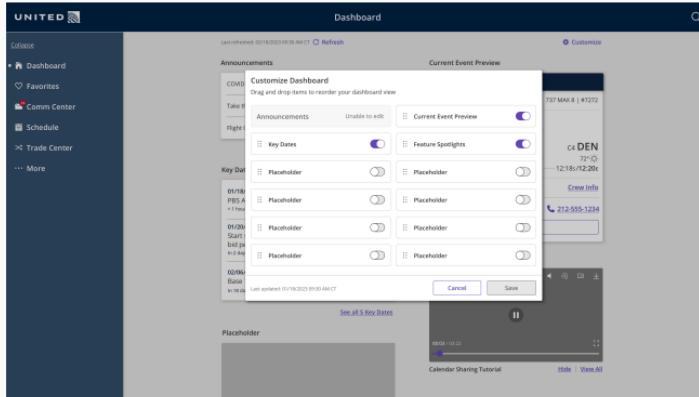

As reviewed in our SP04 UT readout, orientation of the dashboard is zig-zag ($1 > 2 > 3 > 4$). This is to ensure top-priority items don't fall to the bottom of the dash when reduced to a smaller desktop, tablet, or mobile device.

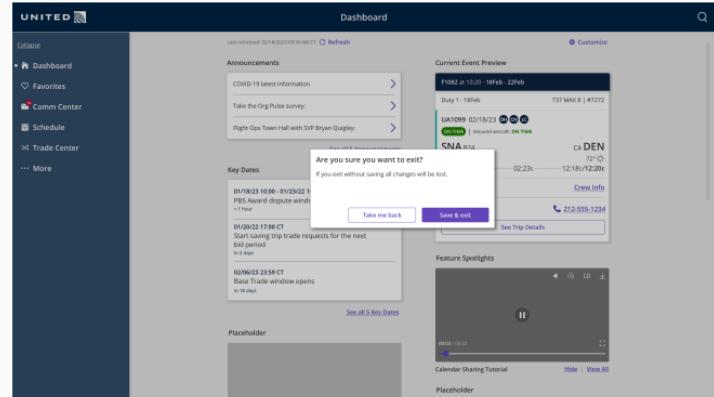

Additional use cases

Dashboard Customization

Once a pilot saves a change and revisits the customization modal, a time stamp will display indicating when the last update was made to the dashboard.

If a pilot clicks out of the customization modal or selects Cancel, the pilot will be prompted with a modal prompting them to save changes

Data loading indicator

For development team

Data Loading indicator

Below are few examples where loading indicator could display. Dev team will reach out to UX if additional examples are needed.

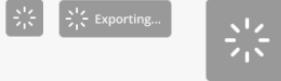

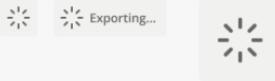

The image displays three separate screenshots of flight booking or trip tracking interfaces, each showing a data loading indicator (a circular progress bar) in different stages of completion.

- Screenshot 1:** Shows a "Trip Details" screen for flight F1082 at 10:20 on 27 Feb. The interface includes sections for "Report", "Time Types (Local, Est-Act)", "Print/Save", and "Details", "Crew", and "Meals". A large circular loading indicator is visible in the center of the page.
- Screenshot 2:** Shows a similar "Trip Details" screen for flight UA1483. It includes sections for "Report", "Time Types (Local, Est-Act)", and "Details", "Crew", and "Meals". A large circular loading indicator is visible in the center of the page.
- Screenshot 3:** Shows a "Dashboard" screen for United Airlines. The dashboard includes sections for "Collapse", "Dashboard", "Favorites", "Comm Center", "Schedule", "Trade Center", and "More". A large circular loading indicator is visible in the center of the page.

Data Loading indicator

When pages or data is waiting to load, a loading indicator will display,

Data loading - page or specific content within page

Form submission is loading

Full page - Scrim with loading icon

Full page - White with loading icon
